OSCE/OSPE

Objective structured clinical evaluation (OSCE) & Objective structured practical examination (OSPE) : Students are exposed to OSPE/OSCE based evaluations. This encourages the students to learn the subject in more structured and analytical methodology. The clinical and practical examination by above method provide a number of chances for the candidate to express one's skills. A number of examination stations with specific instructions are provided. This includes clinical procedures, laboratory experiments, spotter (OSPE) etc. This will avoid examiner bias because both the examiner and the examinee are given specific instructions on what is to be observed at each station and marks are given accordingly.
