Key Indicator – Library as a learning resource

4.3.1 Library is automated using Integrated Library Management System (ILMS)

Response:

Name of the Software: Easylib 6.4a Web cloud.

Name and extent of automation: fully automated.

Year of commencement: 2021

Completion of automation: 2022

Al-Badar Dental College Central Library is a fully automated library with an efficient integrated library management software, EASYLIB 6.4a web cloud.

EASYLIB 6.4a web cloud is a comprehensive library management software designed to streamline the administrative and operational functions of libraries. Developed with a user-centric approach, Easylib caters to various types of libraries, including academic, public, special, and corporate libraries. The software is known for its robust features, intuitive interface, and the ability to integrate seamlessly with modern library practices.

Key Features

1. Catalog Management:

Easylib offers a powerful catalog management system that allows libraries to catalog books, journals, e-books, and other resources efficiently. The software supports various cataloging standards, including MARC21 and RDA, ensuring compatibility with international library systems.

2. Circulation and Borrower Management:

The software simplifies the process of issuing, returning, and renewing library materials. It maintains detailed records of borrower transactions, including overdue items, fines, and reservations, ensuring smooth and efficient circulation management.

3. Acquisition and Serials Management:

Easylib facilitates the acquisition process by allowing libraries to manage vendor information, purchase orders, invoices, and budgets. Additionally, it supports serials management, helping libraries to keep track of subscriptions, issues, and renewals of periodicals and journals.

4. OPAC (Online Public Access Catalog):

The software includes a user-friendly OPAC module that allows patrons to search the library's catalog online. The OPAC supports advanced search features, such as Boolean search, filters, and keyword search, making it easy for users to find the resources they need.

5. Reporting and Analytics:

Easylib provides comprehensive reporting and analytics tools that help library administrators to generate various reports on circulation, acquisitions, cataloging, and user activity. These reports aid in decision-making and in enhancing the library's services.

6. Integration and Customization:

Easylib supports integration with various third-party systems, including digital repositories, learning management systems, and payment gateways. The software is highly customizable, allowing libraries to tailor its features to their specific needs and workflows.

7. User Management and Security:

The software includes robust user management features, enabling administrators to define user roles, permissions, and access levels. It ensures the security of library data through encryption, regular backups, and secure access protocols.
